

I am a listener that got XM because the local radio stations stink. There are other words for the local stations but I won't use them here. Frankly I'm tired of the same songs being repeated everyday until the song is no longer a favorite I just plant hate it, because I have listened to it soooo many times. Now with XM radio I don't hear a repeat song if I keep it on the same channel all day. Now if I go to another channel I may hear it again, but its not that likely. The traffic and Weather are ausome. The stations help me get out of some of the most horrific traffic conditions that I have ever seen. Getting rid of this very important service would be devastating. There is now where on any local radio station that you can get traffic, and weather 24/7. So why not have it when we can. XM radio is the way of the future, and I believe it's here to stay.
